

Conservation Commission Minutes
Draft until Approved
Field Session
Nov. 7th, 130PM

Present: Commission members Mike Dufihlo, Pam Smilie, Bill Terry and Tom Seidel. Soil Scientist Greg Howard and hydrologist Sean Sweeney

The commission walked the Falls with Greg Howard and Sean Sweeney. We asked Greg to give us feedback on his 2013 Action Plan and Sean to provide his opinion on the stability of the section of river bed/bank just upstream of the bench. This is the section of river which comes closest to Carter Notch Rd. and has the “new” overflow channel which makes the bench an island in large rain events.
